

## Conn-Weld Vibrating Screen Essentials Seminar

**Optimize Performance • Reduce Downtime • Increase Efficiency**

Hosted at Conn-Weld's New Conference and Seminar Center

*Wild and Wonderful West Virginia*

---

### What's Inside the Seminar

A streamlined course, led by experienced specialists, designed to give your team both technical knowledge and hands-on practice:

- **Screen Fundamentals**
  - Types & motions of vibrating screens
  - Sizing and application for optimal throughput
- **Performance & Materials**
  - Screen media selection and material effects
  - Proper feed techniques and wear item management
- **Maintenance Mastery**
  - Lubrication, leveling, and spring health
  - Common issues and solutions to extend service life
- **Diagnostics & Testing**
  - Card test and bump test methods
  - Commissioning checklists & baseline performance tracking
- **Hands-On Learning**
  - *Attendees will install a complete drive shaft and bearing kit under the guidance of seasoned Conn-Weld professionals*
  - Walkthrough of proper tools, safety protocols, and torque specs
  - Real-time instruction on aligning, balancing, and securing critical components
  - Maintenance best practices demonstrated live during the installation process
- **Best Practices in Action**
  - Equipment wellness checks
  - Proven routines to minimize downtime and maximize efficiency

---

### What You'll Receive

- A printed take-home workbook with diagrams, checklists, and reference materials
- A Certificate of Completion recognizing your skills advancement
- Practical insights directly from Conn-Weld's skilled instructors

---

## Benefits to Your Operation

- Reduce costly unplanned downtime
- Extend the service life of your screens and drive components
- Lower maintenance and replacement expenses
- Improve throughput and material separation consistency

---

## Add-On Adventure: Team Building in the Mountains

Take your training beyond the classroom with optional team-building experiences in West Virginia's great outdoors:

- Whitewater rafting
- Ziplining & off-roading
- Fishing & sporting clays

These activities strengthen morale, encourage collaboration, and reinforce the problem-solving mindset learned during the seminar.

---

## Who Should Attend

- Plant & Maintenance Managers
- Process Engineers
- Equipment Operators
- Quality Control Teams

---

## Reserve Your Spot Today!

Email us or call to register your team. Join us in West Virginia and transform knowledge into efficiency, longevity, and performance.
