About Us

Conn-Weld Industries, LLC. is a leading manufacturer based in Southern West Virginia where - *our country roads lead around the globe*. We believe in supporting our community, investing in our people, and staying grounded in our roots. From the moment our employees walk through the door we foster a culture of support, knowing that everyone plays a role in serving our customers. We take pride in manufacturing our equipment from raw material to finished product. We are committed to gaining the trust of our customers by delivering the kind of service and support that makes us stand above the rest.

The Conn-Weld Difference

Sharing Knowledge – Each team member brings specialized experience.

Team Training – Continuous training & development staying up to date on industry technology and trends.

Customer Seminars – We provide training seminars for our customers at our facility or customers' site.

Evaluating Processes – Our team evaluates customers' plant environment in sizing and application.

Relationship with our Partners

Conn-Weld ensures support of our products and services in all the markets we serve across the United States and internationally. Whether serving your industry directly, or through one of our trusted partners, we remain a constant resource to our customers.

Statement of Sustainability

As responsible environmental citizens, Conn-Weld is committed to keeping West Virginia *Wild & Wonderful* by doing our part for the planet. We build products that last by purchasing quality materials through American based vendors. We design and develop products that support recycling. Our maintenance program facilitates end-users operating our equipment responsibly. A mechanism rebuild program minimizes waste by offering end-users a cost-efficient way to exchange and purchase. Conn-Weld fosters a diverse inclusive culture providing opportunities for advancement inside our organization while actively recruiting within our community. Our international internships have resulted in careers. We believe in giving back by contributing both voluntarily and monetarily to those who make a difference. Our goal is to continuously evaluate our processes investing in technology and equipment that generates a sustainable facility, ultimately contributing to the well-being of our employees and our community.

Statement of Responsibilities

Conn-Weld confirms that proprietary technical documentation for our products are kept on file and are made available upon request for contractual purposes.

Statement of Quality

Conn-Weld Industries holds to rigid procedures set forth as stringent as any ISO certification by strict quality control techniques, monitoring, analyzing, and other methods to ensure that our equipment meets design specifications and tolerances in accordance with all terms and conditions of sale and OEM standards.
